ISO/IEC 27001:2022 Lead Auditor

What is ISO/IEC 27001:2022 Lead Auditor?

- ISO 27001 ISMS Lead Auditor training is a thorough program aimed at equipping professionals with the vital skills and knowledge necessary to conduct audits of an organization's Information Security Management System (ISMS) according to the ISO/IEC 27001 standard. The curriculum includes key topics such as the core principles of the standard, effective auditing techniques, and essential risk management practices. Participants gain insights into planning and executing audits, collecting and analyzing evidence, and evaluating compliance with relevant regulations. The program also highlights the significance of clear reporting and follow-up processes to ensure that audit findings result in actionable improvements. Upon successful completion, attendees typically earn certification, allowing them to take on the role of Lead Auditors and significantly contribute to strengthening their organization's information security framework.
- **The ISO/IEC 27001:2022 Lead Auditor Training course is certified by Exemplar Global, USA**

In line with these objectives, we are pleased to announce a 5-day, 7-hour online training & Certification on ISO 27001 LA.

Trainer profile

Ketan Shah,

Cyber Security Professional,
Certified Trainer and Auditor

Results-oriented professional with over 24 years of experience, including 18 years spent developing and implementing effective management systems. Specializing in protecting key assets and processes via the installation of different management systems such as Information Security (ISMS), Business Continuity (BCMS), and Service Management (SMS) across a wide range of organizations in both the commercial and public sectors. Expertise in performing complete risk assessments, guaranteeing compliance with complicated legislation, and integrating many standards and frameworks to achieve maximum effectiveness. Strong analytical, problem-solving, and decision-making talents, along with great communication and interpersonal skills, allow me to manage and motivate teams to achieve strategic security and operational objectives.
